## Product Recall

Dear Customer,

**DECHRA Veterinary Products Limited** has issued a recall of **SPECIFIC COW-HY MANAGEMENT PLUS 6X300G** with code **01.03.2023 4308** due to the product containing normal ingredients. Please note any products with code **01.03.2023** without 4308 on the end are safe.

Although the diet of the affected batch is complete and safe to feed to normal healthy dogs, it is (in contrast to SPECIFIC COW-HW Allergen Management Plus) not based on hypoallergenic ingredients and could therefore induce a relapse of clinical signs of food allergy when fed to dogs diagnosed with food allergy.

## Actions Required

- Please examine your inventory and **immediately quarantine** any products identified above, with code **01.03.2023 4308**
- Please perform an inventory count against each product and record this on page two.
- Please return any of the affected batches along with page two of this document which must have **all sections completed** so we may issue your credit.
- **The close date for returns/credit is Friday 30<sup>th</sup> July**

If you have any concerns and have already sold this product to end users please contact **Dechra** directly to discuss further.

Many thanks, and we apologise for any inconvenience.

Yours faithfully,

Chris McMenaman  
Responsible Person & WQP
