

# Suspension of Veterinary Medicines containing the excipient Diethanolamine (DEA)

The VMD update can be found [here](#).

The VMD has suspended all medicines targeting food producing species that contain the excipient Diethanolamine (DEA).

The following stocked lines have been removed from sale:

- Cronyxin 50ml and 100ml (Bimeda)
- Finadyne 50ml and 100ml (MSD)
- Allevinix 100ml (Ceva)
- Flunixin 100ml (Norbrook)

## Approved Products

Currently the only approved product is Meflosyl (Zoetis). Whilst this still contains the excipient stated, the target species has been changed to equine only, and not for horses intended for human consumption. Please see details [here](#)

## Placing an Order

Currently supply is being controlled by and can only be purchased directly from Zoetis.

Please contact your Zoetis rep who will send your order to us for fulfilment.
