

## Project Implementation, Consultancy and PMS Training

At MWI Animal Health our team of Implementation Consultants can offer a range of tailored training and consultancy services to help our practices in providing excellent patient care.

### **Is your practice having issues with any of the following?**

- Poor stock control, excessive wastage, or regularly running out of vital products?
- Poor client compliance for preventative health treatments?
- Low uptake for the practice's preventative Health Care Plans?
- Diluted PMS knowledge after a period of high staff turnover?
- A lack of integration and traceability for pet insurance claims and laboratory test results?
- A lack of time to accommodate CPD?

## How MWI Animal Health can help...

- Tailored inventory management consultancy and training sessions aimed at reducing wastage and streamlining wholesale ordering processes.
- Comprehensive Compliance Reminders training to increase client compliance and loyalty.
- One to one consultancy to create or refine your Health Care Plans.
- Refresher courses to ensure the practice staff remain up to date with the latest changes in your PMS.
- Training sessions on our VetXML module and integration of internal laboratory equipment, bringing key practice systems together to enhance patient care.
- Our training and consultancy packages are available both remotely or on site, offering valuable, flexible CPD hours for practice staff.

## How does it work?

Request a training & consultancy quote via [techsales@mwiah.co.uk](mailto:techsales@mwiah.co.uk)

Our Sales Team will provide a quote for you to sign and return

An Implementation Consultant will be in touch to arrange a convenient time and place for your session
